Summary

Ahmed Salah is a Front-End Developer specializing in Angular with a Bachelor's in Computer Science (GPA: 3.73). Proficient in building scalable, responsive web applications and managing complete SDLC processes. Known for problem-solving, adaptability, and communication skills.

Education

Bachelor of Computer Science | Higher Technological Institute, Tenth of Ramadan city,

GPA: 3.73 July 2023

Skills

- **Frontend Tools**: HTML, CSS, JavaScript, Sass, Bootstrap, Tailwind, Angular.
- **State Management**: RxJS, NgRx.
- **Workflow**: Git, GitHub, Agile/Scrum.
- **Other Skills**: OOP, Data Structures, Algorithms, REST APIs.
- **Leadership**: Managed teams in agile settings.
- **Problem-Solving**: Delivered optimized solutions under tight deadlines.

Projects

CRUD

A responsive employee task management platform with multi-language supports, dark/light modes, and optimized performance.

Link: GitHub **Api:** Swagger

Features:

- Lazy Loading (*Optimizes the application's performance by loading modules only when needed, reducing initial load time*).
- Workspace project (*Organizes the codebase into multiple projects for better scalability and modularity*).
- Interceptor **(***Automatically adds authentication tokens to API requests, ensuring secure communication***).**
- Angular material **(***Provides a clean, modern UI with pre-designed components for faster development***)**.

- implemented localization using i18n to support multi languages
- Skeleton **(***Displays placeholders while data loads, improving the user experience by reducing perceived wait times.***)**
- Dark/light modes (*Allows users to switch themes based on their preference for better usability in different lighting conditions*).

Tech Stack:

- Sass, Bootstrap, Typescript, Angular

QUIZ

A platform for managing and evaluating student quizzes.

Live Demo : https://ahmedsalah2551.github.io/EXAM

Link: GitHub **Api:** JSON

Features:

- Routing Guards **(***Ensures secure navigation by restricting access to specific routes based on user roles***)**.
- Lazy Loading **(***Speeds up the initial load time by loading only the necessary modules when required***).**
- Managing bundle size **(***Reduces application size for faster loading and better performance***)**.

Tech Stack:

- Sass, Bootstrap, Typescript, Angular, Angular-material, Json file

To Do List

A task management tool with drag-and-drop functionality.

Live Demo: https://ahmedsalah2551.github.io/Advanced_ToDoList/

Link: GitHub **Api:** Local Storage

Features:

- Standalone (*Simplifies the architecture by using independent components, reducing dependencies*).
- CDK drop list (*Enables users to rearrange tasks intuitively by dragging and dropping*).
- Full CRUD Operations (*Allows users to add, edit, delete, check, and rearrange tasks, covering all task management needs).*
- Responsive design (*Ensures the application works seamlessly across different devices*).

Tech Stack:

- Sass, Typescript, Angular, Angular-material
